We envision a community that seeks to experience, and respond to, the heart of God. We believe that God desires to draw people UPWARD into a relationship with Him; that He desires women and men to participate in the divine nature. In being drawn into God Himself, we will begin to experience the community of the triune Godhead, the INWARD life of fellowship with other members of God's household. As God continues to share with us His very nature, we will begin to experience His broken heart for this world. As God the Son came to seek and save the lost, we too will live our lives OUTWARD in a reflection of our Lord's selfless love for this world. God imparts His very Spirit to us, indwelling and empowering us; as we experience this, we too will begin to live our lives FORWARD, pouring out into others that which has been poured into us.
